

Use of Vision Insurance VS Medical Insurance

I understand that any disease or disorder of the eye WILL NOT be covered by my vision insurance and must be billed to my MEDICAL insurance.

Examples of things that will be billed to my MEDICAL INSURANCE include, but are not limited to the following:

- -Cataract Care
- -Glaucoma Care
- -Diabetes Examinations
- -Macular Degeneration Examinations

Routine Vision Exams include only the following:

- The determination of the best possible vision for the individual patient
- -Generation of possible glasses or contact lens prescriptions
- -Screening for possible need of further medical or surgical evaluation of the eye

I understand that I may request to have a routine vision exam only. If I request a vision only examination and there is a medical issue that needs to be addressed, I understand I will be asked to return again to evaluate and treat the medical condition.
